JK / JAN KAISER / CV

Software engineer with 15+ years of experience building complex, real-world systems across industrial, spatial computing, and data-heavy domains. Operates at a staff level - designing systems across boundaries (APIs, data flows, user interfaces) and turning ambiguous, high-dimensional problems into usable, high-performance products. Takes end-to-end ownership from product shaping to production systems, contributes to architectural direction, and acts as a technical anchor within teams - unblocking engineers, driving clarity in ambiguous situations, and enabling pragmatic decision-making across product and engineering.

System design (API ↔ UI) **End-to-end ownership** **Ambiguous problem spaces**

Architecture under constraints **Mentorship & technical leadership**

☆ **Speaker at FrontKon 2026 – https://youtu.be/lec18suXMzc (English)**

☆ **Speaker at FrontKon 2024 – https://youtu.be/0hSA5bILAOQ (Czech)** ☆ **Nx Certified Expert**

SELECTED **IMPACT**

> *Led the evolution of a frontend platform for an industrial plant control system, enabling engineers to compose and operate production configurations across deployments; contributed to architecture and company-wide frontend standards.*

> *Bootstrapped a spatial computing platform as the first engineer, designing and implementing a real-time system for time-based 3D data visualization (Babylon.js, React, RxJS).*

> *Drove modernization of a US-based financial platform from a legacy monolith to a Next.js + API architecture, handling complex integrations (e-commerce, learning platforms, SSO) and stabilizing delivery during a critical phase.*

WORK **EXPERIENCE**

08 / 2022 - Present

Senior Software Engineer

@ This Dot Labs

Delivered across multiple complex client systems (frontend and full-stack), often entering partially defined domains and driving solutions from exploration to production.

Owned end-to-end system design and delivery across environments with legacy constraints, external integrations, and complex data flows.

Led technical discussions with clients - shaping requirements, challenging assumptions, and aligning architecture with business constraints.

Acted as a high-leverage engineer within teams, unblocking delivery, resolving critical issues, and providing structure in ambiguous situations.

06 / 2017 - 10 / 2022

Senior Software Engineer

@ Bühler Group

Led development of a frontend platform for an industrial plant control system used to configure and operate real-world production environments.

Designed a modular ecosystem of Angular packages enabling engineers to compose complex plant configurations across deployments.

Acted as the primary senior engineer driving architectural decisions and contributing to company-wide frontend standards and shared component systems.

Translated complex domain requirements into reliable, usable interfaces, enabling other engineers to build on top of the platform effectively.

05 / 2015 - 05 / 2017

Software Engineer & Technical Consultant

@ Quanti

Worked across multiple bespoke systems, contributing to both implementation and early-stage design, including API design, system modeling, and frontend development.

Partnered directly with clients to define requirements and translate them into technical solutions, bridging business needs and engineering execution.

Operated as a generalist across projects, combining system design, frontend implementation, and coordination responsibilities.

01 / 2014 - Present

Co-founder & Technical Lead (part-time)

@ 7divs

Co-founded and built a CMS platform focused on simplicity and standardized frontend architecture for small business websites.

Designed and implemented the system end-to-end, including content management, configuration-driven architecture, and frontend structure.

Continuously evolved the platform, balancing usability, flexibility, and long-term maintainability.

09 / 2014 - 04 / 2015

Frontend Engineer

@ E-commerce Holding

Worked on customer-facing e-commerce platforms within a large, VC-backed group, contributing to frontend development and user experience improvements.

Developed and maintained frontend features across evolving backend systems (from .NET to PHP-based platforms).

Collaborated with designers and product teams to improve usability and consistency across key user flows.

01 / 2013 - 09 / 2014

Creative Coder

@ Bistro Agency

Developed interactive, animation-heavy landing pages for marketing campaigns for clients such as Vodafone and McCann Erickson.

Focused on building polished user experiences and frontend interactions, often working closely with art directors in a fast-paced agency environment.

Contributed to early e-commerce-related projects, which led to a transition into product-focused development.

09 / 2012 - 12 / 2012

Front-end Developer

@ LOGICA (now part of CGI)

Joined a challenging enterprise project as the sole frontend engineer, working within a .NET-based system.

Delivered frontend solutions under strict constraints, including Bootstrap-based UI and legacy browser support (e.g. IE6).

06 / 2012 - 12 / 2012

Front-end & PHP Developer & Art Director

@ Zen Systems

Worked across a range of small projects, contributing to frontend development, PHP backend work, and UI/design tasks.

Delivered end-to-end features in a generalist role, combining implementation with basic visual and interaction design.

10 / 2011 - 06 / 2012

Front-end Developer & Graphic Designer

@ Develion Art

Started as a graphic designer and moved into frontend development, working across both design and implementation.

Contributed to internal and client projects, combining UI design with frontend development.

Developed early experience bridging design and engineering.

10 / 2007 - Present

Freelance Software Engineer (part-time)

@ jankaiser.cz

Delivered websites and small applications end-to-end, covering frontend implementation, backend integration, and visual design.

Worked directly with clients to shape requirements and deliver production-ready systems with full ownership.

EXAMS AND **EDUCATION**

2022 - Present

Biomedical Informatics (PhD)

@ 1st Faculty of Medicine, Charles University

Applying statistical methods and machine learning models to predict weight reduction outcomes in clinical contexts

2018 - 2020

Cognitive Informatics (Master's degree)

@ University of Economics, Prague

summa cum laude

top of class

2013 - 2018

Applied Informatics (Bachelor's degree)

@ University of Economics, Prague

TECHNICAL CAPABILITIES & **LANGUAGES**

LANGUAGES

Czech (Native), English (Fluent - TOEFL 115/120), French (Fluent)

AI & APPLIED LLMS

LLM integrations, agentic workflows, built an automated log analysis agent that triages production logs, investigates anomalies, and reports issues into Slack

CORE (PRIMARY)

TypeScript, JavaScript, React, Next.js, Angular

ADDITIONAL FRAMEWORKS

Vue, Astro

BACKEND & CLOUD

Node.js, NestJS, Python, PHP, AWS, Vercel, CI/CD, Docker, SQL / NoSQL

ARCHITECTURE & SYSTEMS

System design across API/UI boundaries, domain modeling, pragmatic DDD, modular architectures, integration-heavy systems, legacy modernization

LEADERSHIP & PRODUCT

Technical mentorship, roadmapping, cross-functional communication, UX/UI, Figma
